# LAGING TANDAAN:

Kahit na maliit na pinsala sa kagat ay maaaring magdulot ng Rabies. Kung nakagat ng aso, mangyaring hugasan ang sugat gamit ang sabon sa umaagos na tubig nang hindi bababa sa 15 minuto, pagkatapos ay bisitahin ang pinakamalapit na Animal Bite Treatment Center para magpakonsulta.

Kung ang asong nakakagat ay biglang namatay sa loob ng 14 na araw pagkatapos ng insidente ng kagat, ang aso ay posibleng nahawaan ng Rabies.. Mangyaring iulat ang kaganapan sa opisina ng beteryaryo ng iyong lokal na pamahalaan. Maaari nilang suriin ang aso para sa Rabies nang walang bayad.
